**Sabio Health At Home Selected by Centers for Medicare & Medicaid Services to Test  
Medicare Dementia Care Model**

*Guiding an Improved Dementia Experience (GUIDE) Model Aims to Increase Care  
Coordination, Support for Caregivers*

Today, Sage Health At Home (d/b/a Sabio Health At Home) announced they have been selected by the Centers for Medicare & Medicaid Services (CMS) to participate in a new Medicare alternative payment model designed to support people living with dementia and their caregivers. Under CMS' [Guiding an Improved Dementia Experience \(GUIDE\) Model](#), Sabio Health will be one of almost 400 participants building Dementia Care Programs (DCPs) across the country, working to increase care coordination and improve access to services and supports, including respite care, for people living with dementia and their caregivers.

“CMS is excited to partner with Sabio Health under the GUIDE Model,” said CMS Administrator Chiquita Brooks-LaSure. “GUIDE is a new approach to how Medicare will pay for the care of people living with dementia. The GUIDE participants are envisioning new ways to support not only people living with dementia, but also to reduce strain on the people who care for them, so that more Americans can remain in their homes and communities, rather than in institutions.”

Launched on July 1, 2024, the GUIDE Model will test a new payment approach for key supportive services furnished to people living with dementia, including: comprehensive, person-centered assessments and care plans; care coordination; 24/7 access to an interdisciplinary care team member or help line; and certain respite services to support caregivers. People with dementia and their caregivers will have the assistance and support of a Care Navigator to help

them access clinical and non-clinical services such as meals and transportation through community-based organizations.

"We are thrilled to be selected as a participant in CMS's Guiding an Improved Dementia Experience (GUIDE) Model starting July 1, 2025," said Omar Fernandez, CEO of Sabio Health.

"We are honored to be one of only eight organizations selected in the state of Georgia. This opportunity allows us to make a significant impact on the communities we serve by enhancing care coordination and providing critical support for both dementia patients and their caregivers. Every day, we see the immense needs of those affected by dementia, and this model enables us to offer comprehensive care plans, education, and respite services that can greatly improve their quality of life. We are dedicated to working closely with CMS and our community partners to ensure that more individuals can receive the support they need to remain in their homes and communities."

Sabio Health's participation in the GUIDE Model will help people living with dementia and their caregivers have access to education and support, such as training programs on best practices for caring for a loved one living with dementia. The GUIDE Model also provides respite services for certain people, enabling caregivers to take temporary breaks from their caregiving responsibilities. Respite is being tested under the GUIDE Model to assess its effect on helping caregivers continue to care for their loved ones at home, preventing or delaying the need for facility care.

GUIDE Participants represent a wide range of health care providers, including large academic medical centers, small group practices, community-based organizations, health systems, hospice agencies, and other practices.

This model delivers on a promise in the Biden Administration's Executive Order on Increasing Access to High-Quality Care and Supporting Caregivers and aligns with the National Plan to Address Alzheimer's Disease. For more information on CMS' GUIDE Model, please visit:
